Website

Introduction

Our project focuses on showing how people can access our Free Skill Hub platform through our website.
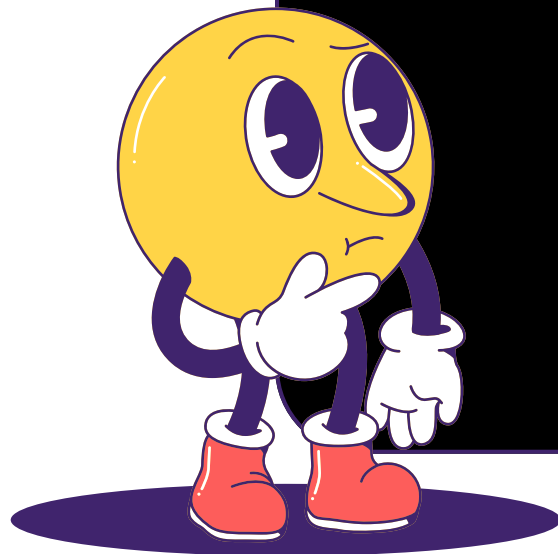

Brainstorm in a team

We read the project heading, and thinking about the time and quality of development, we decided to create a website.

We decided to create a website that would promote our platform, Free Skill Hub, a free study platform.

Difficulties and division of tasks

We had difficulties with the time and schedule of all members, but we managed to reconcile the division of tasks so that all members contributed to the construction and presentation of the project.

Let's go to the Website!
